

## Submitted recommendations

The REACH Regulation requires that ECHA recommends from the "Candidate List" priority substances for inclusion in Annex XIV of REACH (the "Authorisation List") and for these substances proposes Annex XIV entries (i.e. transitional arrangements and, where relevant, exemptions and review periods) to the European Commission, taking into account the opinion of the Member State Committee. The European Commission finally decides, by "comitology" procedure (with scrutiny), which substances will be included in Annex XIV and what the associated entries will be.

The below table includes all substances that have been included in ECHA's draft or final recommendations for inclusion of Candidate List substances in Annex XIV. The "Status"- column indicates whether the substances have been recommended for inclusion or are already included in Annex XIV. Documents relevant for the recommendations can be found by clicking on the "Details" next to the substances.
